USHA SREE THOTA

SOFTWARE DEVELOPER • FULL-STACK & BACKEND ENGINEER

Guntur / Vijayawada, AP | thotaushasree09@gmail.com | +91 6302018102

Portfolio: usha-sree-portfolio.vercel.app | **GitHub:** github.com/Thota-Usha | **LinkedIn:** linkedin.com/in/usha-sree-thota

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science undergraduate (3rd Year, **8.7 / 10 CGPA** at KL University) with a strong foundation in Python, C, SQL, and full-stack software development. Proven track record in architecting and deploying cloud-native recruitment tracking portals and AI platforms featuring production REST APIs and relational databases. Passionate about scalable software systems and eager to drive measurable business impact in an entry-level Software Development Engineer (SDE) role.

EDUCATION

KL University, Vijayawada, AP — **Aug 2024 – May 2028**

Bachelor of Technology (B.Tech) — Computer Science & Engineering (CSE) — **CGPA: 8.7 / 10.0**

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Full-Stack Web Development, Operating Systems, Computer Networks.

TECHNICAL SKILLS

Programming Languages:	Python, C, Java, JavaScript (ES6+), SQL
Web & Frameworks:	FastAPI, RESTful APIs, JWT Authentication, HTML5, CSS3, Tailwind CSS
Databases & Big Data:	PostgreSQL (Supabase), MySQL, SQLite, Apache Spark (PySpark), Pandas
Developer Tools & Cloud:	Git, GitHub, VS Code, Postman, Vercel, Railway Cloud, Agile Methodology
CS Fundamentals:	Data Structures & Algorithms (DSA), OOP, Database Design, System Architecture

KEY SOFTWARE PROJECTS

Campus Placement & Recruitment Drive Portal | Live Demo • GitHub — *Python, FastAPI, Supabase, Tailwind, JWT*

- Architected a production full-stack portal managing recruitment drives, candidate cutoffs, and transparent student directories.
- Built automated CGPA validation and a 5-stage recruitment state machine (Applied → OA → Interview → Offered).
- Deployed live to Railway Cloud integrating Supabase PostgreSQL connection pooling and Swagger API docs (/docs).

Savory AI Bistro — Intelligent Restaurant Platform | GitHub — *Python, REST API, SQLite, JavaScript, Gemini AI*

- Developed full-stack ordering platform featuring catalog CRUD, persistent cart state, table booking, and 5-step live order tracking.
- Integrated Gemini AI culinary sommelier alongside an automated Allergen Collision Shield preventing ingredient mismatches.

Food Delivery Big Data Analytics & Café System | GitHub — *Python, PySpark, Pandas, MySQL, HTML/CSS*

- Implemented an Apache Spark (PySpark) & Pandas analytics pipeline processing delivery records for operational metrics.
- Built a responsive Café Management Web Application integrated with MySQL for order handling and inventory tracking.

PROFESSIONAL EXPERIENCE

Software Developer Trainee / IT Intern — **Professional Training / Internship**

Software Development & Web Engineering — *Remote / Hybrid*

- Engineered, tested, and maintained responsive internal web application interfaces using HTML5, CSS3, and JavaScript.
- Collaborated with engineering peers in debugging, resolving UI/UX rendering defects, and optimizing page load speeds.
- Gained practical exposure to Agile sprints, Git version control workflows, code reviews, and software quality assurance.
